

Report #: 6
Date: 3/21/2022

Project Name: Rust Cleaners
Prepared by: Arsh Kabarwal, Olivia Ornelas, Kipp Corman, Joseph Carpman

Agenda for the weekly meeting

1. Discuss the state of the current prototype
2. Go over deliverables for the next week
3. Talk about other potential features that could be added

Accomplishments during this period

1. Directory tree on website is fully functional
2. Checkbox added to website
3. Frontend prints the results from cargo audit
4. Cargo audit output is formatted for the user
5. Loading element is added
6. Script created to format tool output for parsing
7. Finished CDR and presentation

Plans for the next period

1. Create a fully functioning checkbox
2. Start on integrating Soteria as a tool
3. Start on function to highlight lines to display errors
4. Continue formatting the frontend for the user interface
5. Work on file upload feature

Project management status

1. Worked independently throughout Spring break and combined elements on the weekend
2. Divided tasks for the week.
3. Updated gantt chart with weekly progress.
4. On schedule.

Minutes from meeting with professor

Focus more on front end

Have at least 1 tool output to the screen for the user

Make the service user friendly

Create a design for the tool
