

Report #: 9
Date: 4/10/2022

Project Name: Rust Cleaners
Prepared by: Arsh Kabarwal, Olivia Ornelas, Kipp Corman, Joseph Carpman

Agenda for the weekly meeting

1. Display progress
2. Go over deliverables for the next week
3. Discuss domain purchase

Accomplishments during this period

1. Database caches tool results, and won't re-run tools for a commit it has seen before.
2. Each submission is assigned an ID which can be accessed through a URL, and will be emailed to users in the future.
3. Domain purchased and DNS setup through AWS
4. AWS Workmail setup, working towards functionality for sending emails
5. Warning summary as default output

Plans for the next period

1. Use AWS Simple Email Service API to automate emails
2. Button for travel between warning summary and IDE
3. AWS hosting for load balancing

Project management status

1. Olivia and Arsh worked on front-end, while Kipp and Joseph worked on the back-end
2. Divided tasks for the week.
3. Updated gantt chart with weekly progress.
4. On schedule.

Minutes from meeting with professor

Have errors display first before the file tree

Continue to focus on user experience

Put precedence on features with more significance

Add email functionality to help user experience
