

Report #: 5
Date: 3/07/2022

Project Name: Rust Cleaners
Prepared by: Arsh Kabarwal, Olivia Ornelas, Kipp Corman, Joseph Carpman

Agenda for the weekly meeting

1. Discuss the achievements from the previous week
2. Ask about the requirements for the CDR presentations
3. Establish deadlines for the upcoming week

Accomplishments during this period

1. Web application hosted on AWS
2. DynamoDB set up
3. Frontend prints error messages
4. Docker container creation
5. Additional script refinement
6. Formatted cargo-audit, clippy, and rust-code-analysis
7. Fixed script to run clippy

Plans for the next period

1. Format the output of Soteria
2. Create a finalized design of the outputs of the tools
3. Start caching results inside of the database
4. Connecting the Docker environment with the database
5. Continue formatting the frontend

Project management status

1. Worked more independently throughout the week to get different tasks done
2. Plan to meet more next week as a team to start putting elements together
3. Divided tasks for the week.
4. Updated gantt chart with weekly progress.
5. On schedule.

Minutes from meeting with professor

Place focus on consumer experience
